

Weekly Progress Report

Name: Rahad Uddin Jisan

Domain: Introduction to SEO & Google Algorithms

Date of submission: 28/01/2026

Week Ending: 02

I. Overview:

This week's primary focus was on developing a foundational understanding of Search Engine Optimization (SEO) and gaining insight into how Google algorithms work to rank websites. Emphasis was placed on learning how search engines operate, the importance of SEO in digital visibility, and how algorithm updates influence search results.

II. Achievements:

1. SEO Fundamentals Familiarization:

Studied the basic concepts of SEO, including on-page, off-page, and technical SEO.
Gained an understanding of how search engines crawl, index, and rank web pages.
Learned the role of keywords, search intent, and organic traffic in SEO strategy.

2. Understanding Google Algorithms:

Explored an introduction to Google's ranking algorithms and their purpose.
Learned about key algorithm concepts such as relevance, authority, and user experience.
Reviewed examples of how algorithm updates impact website rankings and visibility.

3. Practical Learning Activities:

Analyzed simple website examples to understand SEO-friendly structure and content.
Practiced identifying keywords and basic optimization techniques.
Participated in discussions related to SEO best practices and algorithm behavior.

III. Challenges:

1. Technical SEO Concepts:

Faced difficulty understanding certain technical SEO terms such as indexing, crawling, and ranking signals.
Currently reviewing additional explanations and beginner resources for better clarity.

2. Algorithm Complexity:

Found it challenging to fully grasp how multiple Google algorithm factors work together.
Seeking simplified examples to strengthen conceptual understanding.

IV. Learning Resources:

1. SEO Learning Materials:

Used beginner-level articles and guides on SEO fundamentals.

Studied introductory content explaining Google algorithms and search engine behavior.

2. Online Platforms:

Watched video tutorials focused on SEO basics and algorithm overview.

Engaged in online forums and discussions to learn from real-world SEO experiences.

V. Next Week's Goals:

1. SEO Skill Enhancement:

Learn keyword research techniques and basic on-page SEO optimization.

Explore Google ranking factors such as content quality and page experience.

2. Practical Application:

Apply SEO concepts to sample webpages or blog content.

Analyze simple case studies related to Google algorithm updates and ranking changes.

VI. Additional Comments:

This week provided a strong foundation in SEO and Google algorithms. Understanding how search engines function has improved awareness of website optimization and digital visibility. Continued practice and guided learning will help strengthen SEO skills further.
