

Weekly Progress Report

Name: Rahad Uddin Jisan

Domain: Introduction to Digital Marketing & SEO (Google Algorithms)

Date of Submission: 28/01/2026

Week Ending: 03

I. Overview

Over the past two weeks, the primary focus was on building a strong foundation in Digital Marketing and Search Engine Optimization (SEO). The learning process emphasized understanding how digital platforms are used to promote products and services, along with gaining insight into how search engines—particularly Google—rank and display websites. These weeks were dedicated to developing theoretical knowledge, exploring practical tools, and understanding real-world applications of digital marketing and SEO strategies.

II. Achievements

1. Digital Marketing Fundamentals

Studied the core concepts, scope, and importance of digital marketing.

Gained familiarity with key digital marketing channels such as social media marketing, search engines, and email marketing.

Successfully completed introductory learning modules related to digital marketing strategies.

Analyzed real-world digital marketing campaigns to understand audience engagement and brand promotion.

2. SEO & Google Algorithms Understanding

Learned the fundamentals of SEO, including on-page, off-page, and technical SEO.

Gained an understanding of how search engines crawl, index, and rank web pages.

Studied the role of keywords, search intent, organic traffic, and content relevance.

Explored the basics of Google's ranking algorithms and how factors like authority, relevance, and user experience affect search visibility.

3. Practical Learning & Skill Development

- Explored basic digital marketing tools and platforms used for online promotion.
- Practiced identifying keywords and basic SEO optimization techniques.
- Applied theoretical concepts to simple case studies and marketing scenarios.
- Participated actively in discussions and collaborative learning activities to enhance understanding.

III. Challenges

1. Marketing & SEO Terminology

Faced difficulty understanding certain digital marketing and SEO terms, metrics, and technical concepts such as crawling, indexing, and ranking signals.

Addressed these challenges by reviewing beginner-friendly resources and simplified explanations.

2. Strategy & Algorithm Analysis

Found it challenging to analyze and compare different digital marketing strategies and understand how multiple Google algorithm factors work together.

Currently focusing on examples and guided learning to improve analytical skills.

IV. Learning Resources

1. Digital Marketing & SEO Materials

Used online articles, beginner guides, and introductory resources on digital marketing and SEO fundamentals.

Studied simplified explanations of Google algorithms and search engine behavior.

2. Online Learning Platforms

Watched video tutorials and webinars for practical insights.

Engaged in beginner-friendly online courses, forums, and peer discussions to strengthen conceptual understanding.

V. Next Week's Goals

1. Skill Enhancement

Learn advanced concepts such as social media analytics, keyword research, and paid advertising basics.

Explore Google ranking factors including content quality, page experience, and user engagement.

2. Practical Application

- Work on small digital marketing and SEO assignments.
- Apply SEO techniques to sample webpages or blog content.
- Analyze basic case studies related to Google algorithm updates.
- Seek feedback from mentors and peers for continuous improvement.

VI. Additional Comments

These two weeks were highly valuable in establishing a strong foundation in digital marketing and SEO. Understanding how digital platforms and search engines function has improved awareness of online visibility and marketing strategy. Continued practice, collaboration, and guided learning will further strengthen skills in this domain.
